

 Home

Timekeeper is an app that tracks your daily tasks and helps you stay on task with helpful reminders and warnings of inappropriate time uses.

 Tasks

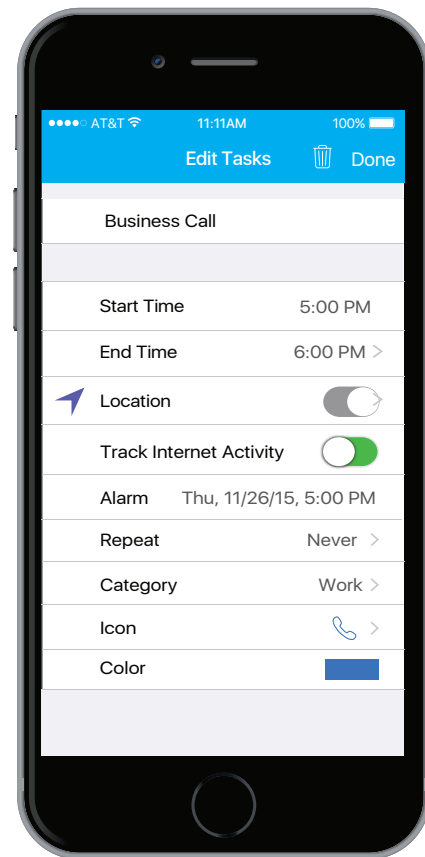

Timekeeper lets you run 2 or more tasks simultaneously. The simple layout makes for a very user-friendly experience.

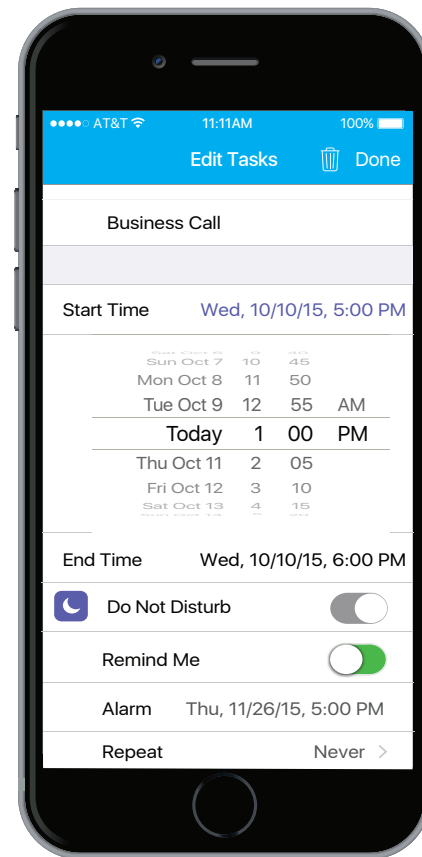

The Tasks menu shows all current tasks. You can also sort tasks by category and color for easier organization.

# Edit Tasks

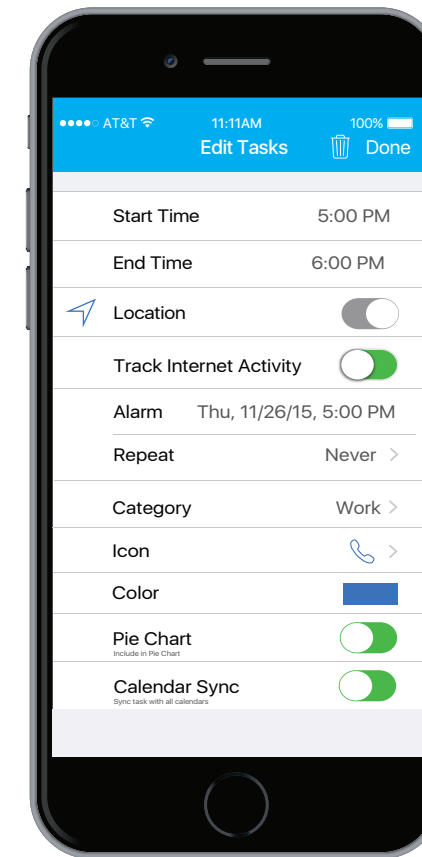

Timekeeper gives you ultimate control over each and every task. Some settings include user location, duration, start/stop time, and internet activity.

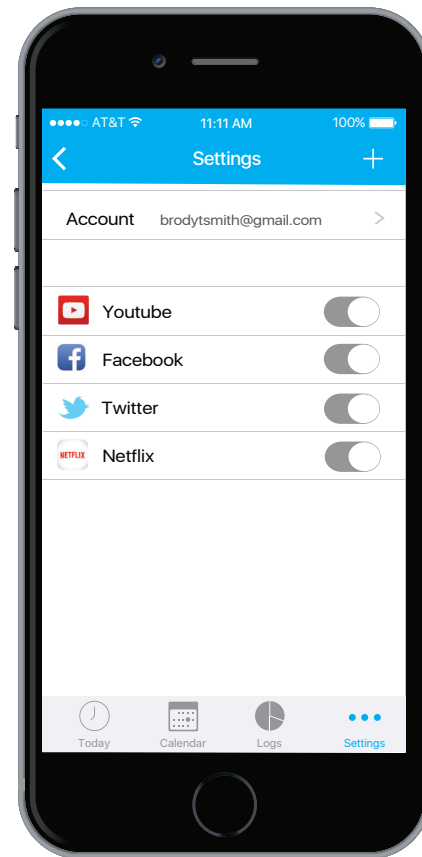

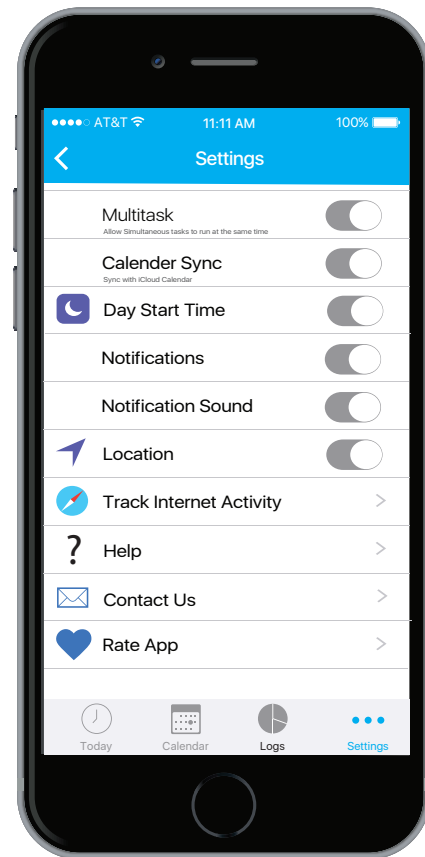

# Edit Tasks

The Edit Tasks page is also where you can select a category and color for the task at hand.

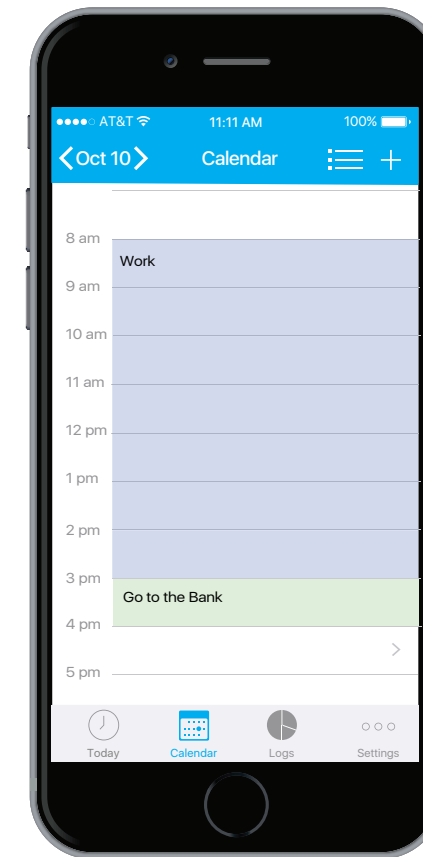

## Settings

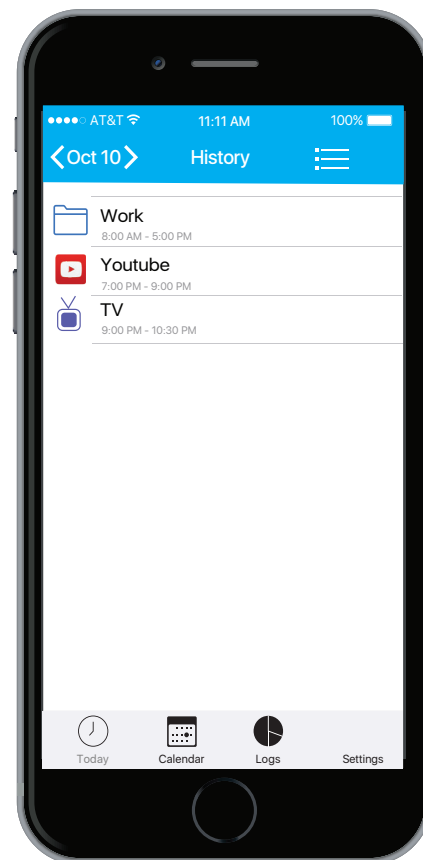

Timekeeper also has a master settings section which allows you to set a day start time, along with configuring your location calendar and iCloud account. This is also where you can choose what websites to track throughout the day.

## Calendar

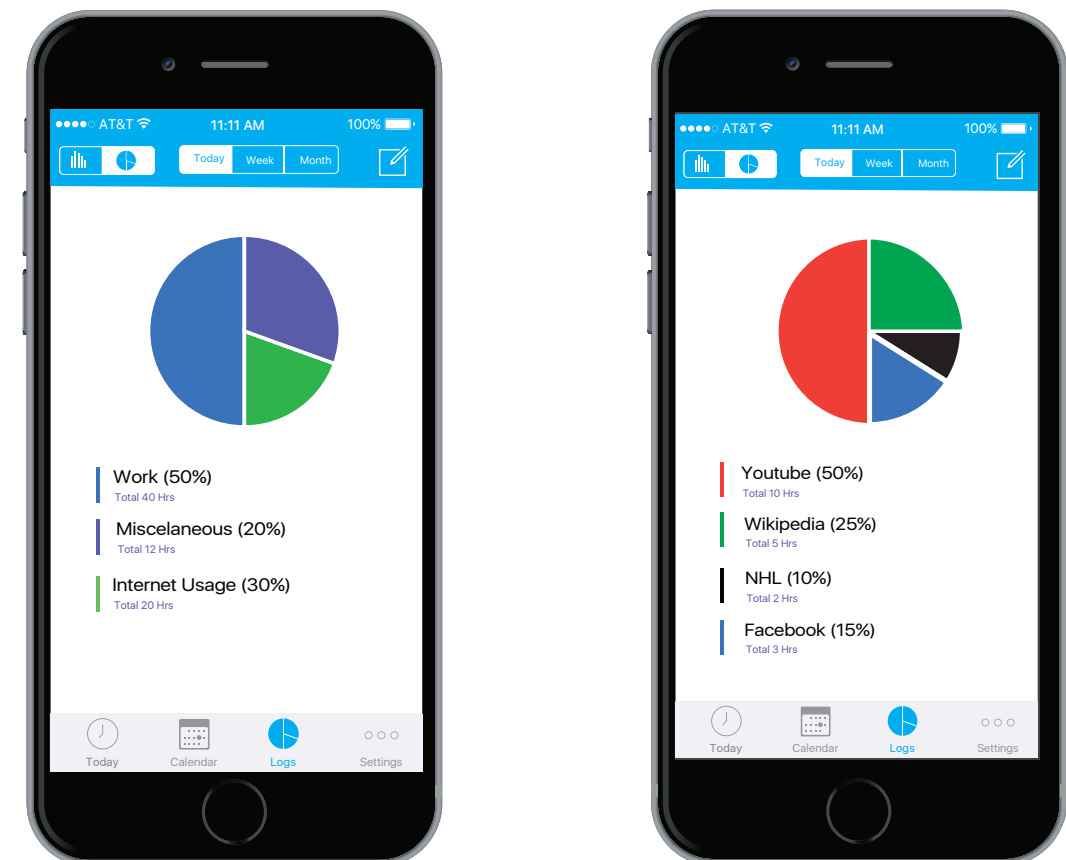

The Calendar page shows your daily schedule with tasks highlighted. You can also add tasks from this page simply by pushing the "+" in the corner.

## History

The Calendar has a list function in the upper-right corner which show the history of all logs and times. These logs include your past locations, average time spent on activities, and frequently-visited internet sites.

## Logs

Logs are taken and graphed automatically every day, week, and year. To view bar graphs simply click the icon in the upper-left corner.
